

Edge AI

Intelligence at the Edge

Versatile Market Applications

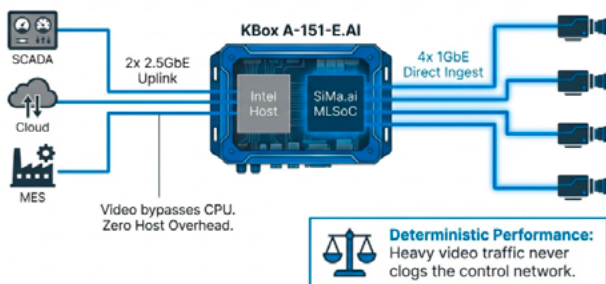

Purpose-built for industrial automation, medical technology, energy, and intelligent transportation—ready to power mission-critical deployments across industries.

KBox A-151 EAI Series

Faster Time to Market

Integrate MLSoC acceleration seamlessly into your existing software stack—no costly redesigns, no disruption, just rapid deployment.

Effortless Multimodal Performance

Enable high-performance multi-camera systems, audio, with zero host overhead—unlock real-time vision processing without compromise.

Freedom from Proprietary Lock-In

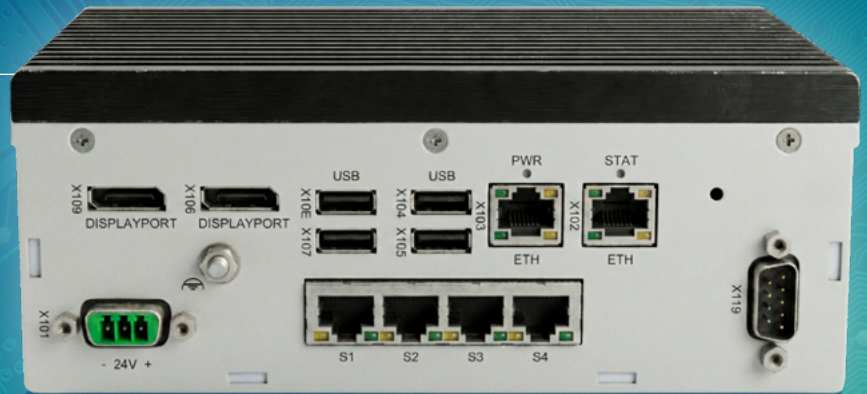

Future-ready for on-device GenAI (localized LLM)—maintain flexibility and control without being tied to a closed ecosystem.

Built for Longevity

Minimize risk with long-term product availability, industrial-grade reliability, and trusted certifications for demanding environments.

Technical Features

- › Designed for 24/7 industrial operation
- › MLSoC acceleration capability
- › Delivers up to 50+ TOPS edge AI performance
- › Energy-efficient architecture

Applications

Industrial edge AI
for automation

Real-time vision
and AI inspection

IoT and 5G connected
edge systems

Autonomous
mission-critical
industrial and
transport
