

The pITX-SP Bios revision R115 may only be used on boards beginning from Kontron CE revision CE 1.0.0 (PCB revision V5.00).

The following pictures show the position of mentioned revision numbers.

Kontron CE revision can be found on the green Kontron Label on the board or the board package:

Kontron PCB revision is printed on the bottom of the pITX-SP:

For the bios update procedure please refer to the pITX-SP Software Guide.

Important Note

Kontron Technology A/S does not take over any guarantee if boards with earlier revisions are updated with this Bios. In this case the complete functionality cannot be guaranteed and the boards can also be damaged.
