

This is release notes for
VxWorks 6.8 / Workbench 3.2 Board Support Package (BSP) for
Kontron KT690 platform.

BSP version R01.00 (10 October 2010)

Limitations:

- This BSP doesn't support Symmetric Multiprocessing (SMP)
as SMP mode requires BSP using VxWorks PENTIUM4 library
that is not compliant with AMD CPUs.
The BSP uses Pentium2 library.
 - HPET timer is not supported
 - SMBus is not supported
 - NVRAM is not supported, no information about NVRAM hardware for this board.
-

Changelog:

R01.00: Initial release.
