- » Secure connection to telematics infrastructure
- » High degree of investment safety thanks to its wide range of application scenarios
- » Electronic health card image capture
- » Remote administration and monitoring
- » Individual customization of functions and user interfaces

eHealth Kiosk

Optimum service for the electronic health card (eGK)

With the eHealth kiosk, the advantages of the electronic health card (eGK) can be utilized effectively. The eHealth kiosk, developed by Kontron and ICW, opens up a range of new possibilities to sponsors and service providers in the health care sector. Health insurance plans can offer members a special on-site service and also automate their services in the process.

The Kontron eHealth kiosk also offers advantages for physicians, hospitals and pharmacies: Along with functions for the electronic health card and the ICW LifeSensor, one's own offers and information can be presented. There is a wide range of ways to customize user interfaces and available functions.

Technical Information

Body	Free-standing with floor mounting
