Built for Demanding Missions

Kontron's embedded computing boards are designed to simplify integration, reduce program risk, and ensure long-term availability. Our customers choose Kontron because we provide more than boards.

Cybersecure by Design

- SEC-LINE™ baseline ensures trusted boot, data protection, and secure boot configuration.
- Embedded cybersecurity services support system accreditation and threat resilience.

Smart Monitoring & Maintenance

- CMON-Line™ health-monitoring suite enables predictive maintenance and asset visibility.
- Continuous diagnostic data for improved fleet readiness and reduced downtime.

Long-Term Supply & Support

- Guaranteed configuration control, component management, and lifecycle planning.
- Local program management and engineering support in Europe and North America.

Open Standards. Rugged Performance. Global Expertise.

Kontron delivers a complete portfolio of VPX and VME embedded computing building blocks aligned with open architecture standards, including SOSA®, CMOS, and the VITA family of specifications such as OpenVPX. Supported by global engineering teams and manufactured in Europe and North America, these boards ensure interoperability, long-term lifecycle and reliable performance for mission-critical systems.

GPU Acceleration through Strategic Technology Partnership

Kontron integrates EIZO Rugged Solutions' NVIDIA® GPU technology to deliver high-performance CPU/GPU capability across its VPX portfolio. By combining its own developments with trusted technology partnerships, Kontron delivers best-in-class CPU/GPU options for demanding AI, ISR, and mission-critical applications.
