

This application note describes problem/fix using an 886LCD, USB KBD and Net in DOS configuration.

Using the 886LCD/ATX, 886LCD/ATXU or 886LCD/ATX-GE having a USB Keyboard connected to USB3 or USB4, then Network does not function in a DOS environment.

This problem does not exist when using USB1 or USB2.

In other words it is recommended to use USB1 or USB2 whenever a USB Keyboard is used.
